

BORN TOUGH
FOR THE TOUGHEST

#Features

INDUSTRIAL POLYMER

This is what makes it toughest from others. Twister series is made up of high-grade industrial polymer which ensures long life and flexibility, Designed twister dynamically this casing provides maximum life to the product. The casing is tested in all weathers to make it sure it gives you its best.

ENERGY EFFICIENT FAN MOTOR

Fan Motor is heart of any cooler, keeping this in mind cyclone cooler motors are designed efficiently to perform 24x7. These powerful motors are 100% copper winded with moisture free outer aluminium shell to give you continuously cooling and keep your premises cool.

AERODYNAMICALLY DESIGNED ALLUMINIUM FAN BLADES

Cyclone Fan blades are made up of pure aluminium to perform longer, with it they are designed aero dynamically to give you powerful air delivery and controlled noise level.

ROHS APPROVED - ANTI BACTERIAL HONEY COMB PADS

Cyclone series is loaded with One of the India's most efficient dense cooling pads with 80% efficiency*, which provides the coolest air even in hot scorching summers. These dense pads provide sharp temperature drop down in short span of time.

AUTO WATER DRAIN AND INLET

Clarion Cyclone coolers comes with auto water drain for trouble free maintenance and auto water inlet which intakes the water as per the need and makes cyclone easier to use.

EFFICIENT COOLING MEDIA

Clarion industrial air cooler features the High-Efficiency cellulose pads to provide the coolest air possible. Each and every industrial air cooler is tested for maximum efficiency & cooling media is tested to provide maximum evaporation, as maximum evaporation provides maximum cooling efficiency. twister is loaded with 100 MM rigid media which is tested and used to ensure that they cool down large area in short span of time

HIGH VOLUME T.O.P CONTROLLED PUMP

Keeping in mind the harsh hot climate of India, cyclone cooler pump is customized to provide required volume of water continuously which helps in faster cooling and water saving. Our pump is designed with thermostatic over protection control ensuring safety and long life performance.

THREE SPEED INBUILT CONTROL PANEL

Clarion coolers comes with three speed control inbuilt panel with which you can control air delivery as per your desire which makes our product easier to use and provide hassle free installation.

GO PORTABILITY

Clarion twister comes with multiple options of installation like it can be used as a portable cooler with detachable trolley it can be installed in a window and even can be used as ductable cooling solution. Its unique shape and design makes it the choice of multiple industrialists.

Antibacterial

Plug & Play

Low Electricity Consumption

1 Year Warranty on Motor & Pump

TWISTER 140

Twister 140, mobile commercial cooler for your large cooling need. This cost- saving device emits fresh chilled air into a required area. It comes with a high delivery axial fan with the longest pad area, which cools down the large area with a short span of time. Twister can be installed in window, duct or on portable wheels. Made up of 100 percent polymer it avoids rusting and expensive maintenance.

Model	Twister 140
Air Flow (CMH)	18000
Fan Size (Inches)	30"
RPM	950*
Connecting Load	
Wattage	750
Voltage	230 (50 Hz)
Dimensions (L X B X H)	44 X 26 X 62 (In)
Tank Capacity (L)	140
Window Cutout (L X H)	32 X 32 (In)
Louvres	Manual
Cooling Area	2500* Sq. Ft.
